

Press Release

Yemeni Riyal Falls against the Dollar and Increases the Suffering of the People of Yemen

(Translated)

The Yemeni riyal is still falling against the dollar and other foreign currencies, with the US dollar fetching more than 500 Yemeni riyals due to conflicts and wars in Yemen between the rivals who attain the interests of their colonial masters, especially America and Britain; the two which are fighting for influence and wealth in the country. Although the salaries are slashed in most of the country's provinces, especially those under the control of the Houthi militias who have tampered with the funds for their war effort, in addition to the disruption of services, unemployment, lack of export of oil and gas and other wealth of the country, and the rampant corruption in them; whether they are under the control of the so-called legality or those under the control of al-Houthi, as both parties have no decision. In addition to the frantic competition between Saudi Arabia and the UAE over the country and its wealth and ports. The United Nations is trying to pressure the parties to the political solution that America and Britain want through pressurizing on the economic side and preventing the disposal of wealth to achieve a breakthrough to the crisis under the intransigence of both parties to accept the solution, especially the Houthis, where yesterday the UN envoy to Yemen, Martin Griffiths, left Sana'a after a three day meeting to negotiate with them. The printing of nearly 600 billion Yemeni riyals has led to currency inflation and its low purchasing value in the face of these conflicts and wars, and the economic war entered into force on Yemen and its people to increase the suffering of the afflicted people of Yemen.

Saudi Arabia, the United Arab Emirates, Iran and others who support and participate in the conflicts and wars in Yemen, whether directly or through the followers, do not pay much attention to the situation and the suffering of the people of Yemen; Iran was promising its Houthi followers that as soon as they take control of Sanaa it will deposit \$2 billion in the Central Bank to support the economy and the Yemeni currency, but it drew back from its promise, and it continues to bring weapons to the Houthis for further war and destruction. Whereas, Saudi Arabia and the United Arab Emirates are spending their money for the West, in arms deals, fighting Islam and lavishness; Saudi Arabia has given hundreds of billions of dollars to America instead of giving it to those who are caught in the fire of its wars, as it is participating in the war of destroying Yemen, even if it hypocritically and deceitfully shows that it stands with its people. If Saudi Arabia really wants to end the Houthis and reduce their influence completely it should have guaranteed the provision of salaries and

other basic needs, services and infrastructure for the people of Yemen who are living in misery, in order to gain the hearts and disperse people from the Houthi, and not to give the people of Yemen crumbs or the so-called 2 billion dollars Saudi deposit, which the media cracked our heads by it without seeing its impact in the country or in supporting the economy!!

It is known that the policy of Saudi Arabia is an American policy that works to involve the Houthis in government and not to be subjected to a severe blow, above all, it fights the expatriates people of Yemen in Saudi Arabia and take them as a mean to earn through imposing exorbitant visas and unfair royalties and then threatening to deport them. Thus, it becomes a capitalist state more than the capitalists themselves; Where Islam is dissociated from its actions and its system. Above that, this policy of it serves the Houthis and enables them to benefit from it by deceiving the people and rousing them to fight on the fronts, even unwillingly and in defiance of it.

O People of Yemen, the People of Iman and wisdom:

It is your duty to work to change the situation in the country to that which satisfies Allah and His Messenger (saw) with you and to prevent the agents and expel the colonists. What you lack is not wealth or resources, rather your country is rich in its wealth, location and manpower. Know that the correct solution is to establish the Khilafah Rashidah State (righteous Caliphate) on the method of the Prophethood, which will put Islam into practice with its correct view of the economic problem. The economic system in Islam is characterized by stability and steadiness and does not fluctuate with the dollar, due to its adoption of the gold and silver base as a basis for currency. Indeed, the economic system in Islam enables every individual to satisfy his basic needs of clothing and housing, and helps his acquire luxuries, along with the application of Islam in the rest of life systems in governance, foreign policy, education, social system and other systems of life...
